9. 
$$(1-\frac{1}{N})^{0.5N} = ((-\frac{1}{N})^{7})^{0.5} = (\frac{1}{e})^{0.5} = 06065$$

10. e, because there is no the same answer as what I derived.

The |xi' - xi| / 2 in the last row should be |xi' - xi|, since I forgot to add two cases together, so there will be no answer according to all answers except (e).

10: 
$$\phi_{ds}(x) T \phi_{ds}(x') = \sum \sum \sum sisign(x'_1 - \theta) sign(x'_1 - \theta) = \sum \sum sign(x'_1 - \theta)(x'_1 - \theta)$$

$$|x'_1 - x_1| = numbers \cdot f \theta \text{ will cause value } t - 1, 2R - 1 - (2Lt 1) + 1 = R - L$$

$$|x'_1 - x'_1| = numbers \cdot f \theta \text{ will cause value } t \cdot 1$$

$$|x'_1 - x'_1| = numbers \cdot f \theta \text{ will cause value } t \cdot 1$$

$$|x'_1 - x'_1| = numbers \cdot f \theta \text{ will cause value } t \cdot 1$$

$$|x'_1 - x'_1| = r \cdot L$$

$$|x'_1 - x'_1| = r \cdot L$$

$$|x'_1 - x'_2| = r \cdot L$$
